STEININGER FOLD. KITCHENS IN THEIR PURE FORM

Design is orientation. Design is differentiation. The kitchens from Steiningger set high quality requirements, they stand out clearly and set standards that move. The same applies to the new kitchen model FOLD at STEININGER. FOLD is a form-strong statement with cubistic surface made in tombac, a golden and shimmering brass finish. The alloy is made using a computer-based method in millimeter fraction precisely prepared and perfected by hand. Encased this way the iconic kitchen seems to float. The design is clear, purist, simple and yet highly functional. The kitchen model FOLD will also be available in other metals and alloys.

LIVING SPACE KITCHEN

Kitchens are the center point of a home. Often they are linked to the living space, creating a central place for cooking, meeting and relaxing. The modern food factory is no longer just focused on cooking. This development reflects the changed perception of this topic. Historically, cooking was seen as a necessity. In this modern age, cooking has reached a level of prestige and appreciation. Who cooks takes time, focuses, finds peace after a working day. The enjoyment of food and cooking is in the foreground. Today, cooking together with family or friends has an important placement in the social life - this is also reflected in the design of the kitchens. The kitchen is a habitat and communication island. As a central living space, the kitchen is a social meeting place for family life and a communicative hub.

PURE AND STRONG

At STEININGER every kitchen is unique. The selected materials play a significant role. When it comes to durability and aesthetics, tombac remains unrivaled. The surface is easy to clean, absolutely hygienic and odourless. The high quality steel surface is immune from intense temperature differences.

ICONS OF THE KITCHEN

Purist elegance and a reflective metal finish characterizes the appearance of the new kitchen model FOLD at STEININGER. Through precise computer based manufacturing technology, metal is shaped into different shapes creating a fascinating kitchen. A precise computer-based selected Manufacturing technology shapes the metal materials of different shades into a fascinating kitchen object. The design language of the kitchen block reminds you of the art of paper folding. FOLD is a dormant geometric body that withdraws its power, but not its presence. The bright, warm brass tone creates an exciting game with the light on its sloping surfaces. With FOLD, Steiningger presents the kitchen in its signature design: as a sculptural object. One would think the function follows the form, but the form knows how to conceal the function. Behind the purist aesthetics lay smooth drawers, technical refinements and exciting details.

STEININGER

ABOUT STEININGER

STEININGER stands for purist, exquisite architecture, interiors and kitchens design. Mastermind Martin Steinger heads the headquarter in St. Martin (Upper Austria), with further locations in Linz, Vienna, Hamburg and London. At STEININGERS BESPOKE designs and architectural settings are in demand internationally: they inspire with striking, clear lines, timelessness and sophisticated details.

Martin Steinger is an esthete and a minimalist. Exceptional design is a decisive added value for him, as things has to work. He subordinates all designs to this creed. It defines space, shape and use accordingly. Urban concrete and rare metal alloys complete the range of materials. A new type of spatial, sensory and tactile experience arises.

BESPOKE DESIGN - THE STEININGER COLLECTION

STEININGER designs are a statement of sustainable luxury, style and comfort. This claim continues in the unique kitchen and furniture. Every design from the STEININGER Collection is made to measure. State-of-the-art CAD programs and cutting edge manufacturing technologies in the Austria production, ensure the highest quality. The artisan take care the fine details at the end. STEININGER is a manufacturer and feels committed to the craft.
