Manufacture - Bespoke Design

In our production facility we manufacture luxurious interiors. All of them are custom-made, produced in artisanal quality. Our designers work hand in hand with the STEININGER production department. This guarantees short distances and rapid coordination.

High-tech production & craftsmanship

The processes at STEININGER are highly mechanised. Thanks to these continuous digital processes, we are able to manufacture a wide range of materials and very complex details in-house. Despite the high-tech production, the finishing is done by hand. STEININGER has been committed to design and craftsmanship for 80 years.

Just in Time

Parts are delivered just-in-time. During quality control, fine-tuning or assembly, the carpenters, designers and project managers themselves lend a hand. This is the only way to ensure that the end product lives up to the designer's original idea.

Outfitting & Assembly

Cladding, panels, technology, furniture - the carefully crafted parts only result in the extraordinary interior when they are assembled with attention to detail. The STEININGER assembly team works globally and assembles the parts directly on site.
