STEININGER

MODULAR KITCHEN WITH FLEXIBLE ELEMENTS, NOMADIC.

The module kitchen with puristic appearance and glamorous inner life. Four freely combinable elements plus three striking material options is same: Culinary puzzle for advancers, consisting of 4 single modules in each case in the materials concrete, stone and ceramics.

FOUR ELEMENTS

COOKING MODULE

Less is more. Three metallic guide markings embedded in the surface show the position of the hidden induction fields, which, in turn, are controlled by three stainless steel controls in equally purist style. The wide drawer directly beneath the hob is an invisible yet indispensable detail.

STORAGE MODULE

Dark smoked oak, golden anodised aluminium, smooth drawer bases: taking a look inside reveals luxurious detail solutions and surprising innovations – automatic LED interior lighting and flexible drawer division using magnetic dividers, to name but two.

SINK MODULE

The concrete unit is carefully moulded and manufactured using concrete parts that are as thin as 8 mm. And the sink itself is no exception. The basin's precise workmanship, the waterfall inlet and the waste drain in the double base provide a small insight into the expertise involved in handling the materials used.

TABLE MODULE

Sit, stand, lie down: the C-shaped table model made of top-quality smoked oak is extremely versatile. It can be attached to the left, right or both sides of the modular unit, depending on your needs.

STEININGER

PLUS 3 MATERIAL OPTIONS

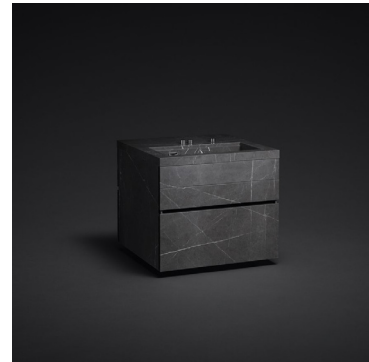

GREY CONCRETE / BROWN CONCRETE

Pores, hairline cracks, grainy edges, unique colouring: the surface of the concrete unit reflects the material's original character – raw and honest, for lovers of puristic aesthetics. The workmanship is all the more precise: just eight millimetres thick, moulded, concrete-poured and carefully treated. Using different types of cement and adding dyes allows for a wide range of tones and shades.

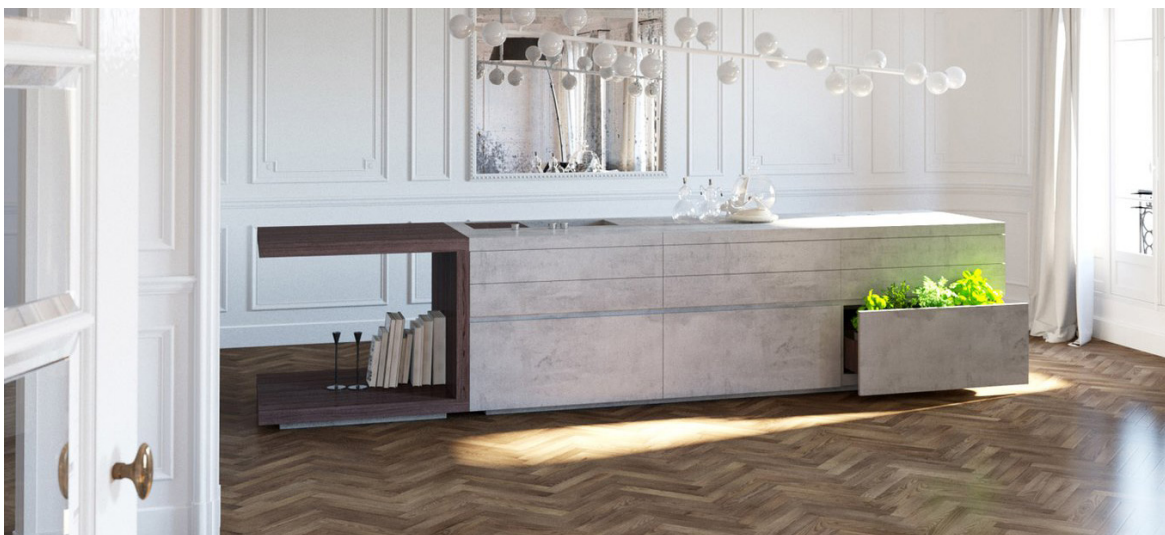

CERAMIC

A worktop that is visually impressive, but extremely tough. With all of the benefits of the natural material of ceramic: scratch and impact-resistant, completely easy to care for and heat-resistant. Many of the ceramic elements used are as little as seven millimetres thick, therefore ensuring that the drawer elements function with ease. Ceramic is also available in many different colour options and with different surface structures.

STONE

Hard and changeable. Cool and elegant. Stone unites these contradictions in perfect harmony, in terms of both aesthetics and functionality. Its structure, combined with expert transformation into elements with a thickness of just twelve millimetres, gives this material a truly special effect. The stone unit comes in a large variety of characteristic types of natural stone.

STEININGER

ABOUT STEININGER

STEININGER stands for purist, exquisite architecture, interiors and kitchens design. Mastermind Martin Steinger heads the headquarter in St. Martin (Upper Austria), with further locations in Linz, Vienna, Hamburg and London. At STEININGERS BESPOKE designs and architectural settings are in demand internationally: they inspire with striking, clear lines, timelessness and sophisticated details.

Martin Steinger is an esthete and a minimalist. Exceptional design is a decisive added value for him, as things has to work. He subordinates all designs to this creed. It defines space, shape and use accordingly. Urban concrete and rare metal alloys complete the range of materials. A new type of spatial, sensory and tactile experience arises.

BESPOKE DESIGN - THE STEININGER COLLECTION

STEININGER designs are a statement of sustainable luxury, style and comfort. This claim continues in the unique kitchen and furniture. Every design from the STEININGER Collection is made to measure. State-of-the-art CAD programs and cutting edge manufacturing technologies in the Austria production, ensure the highest quality. The artisan take care the fine details at the end. STEININGER is a manufacturer and feels committed to the craft.
