## ROCK AROUND THE BLOCK

---

### A KITCHEN THAT DOES IT ALL!

The BLOCK is a 365-degree kitchen among design kitchens and is used creatively and 'misappropriately' as a representative functional design element in the reception area of a hotel, as a communication centre in the award-winning restaurant or representatively in the entry of the company headquarters.

And of course, also quite classically as a luxury kitchen in your own four walls. The BLOCK simply rocks!

### SCULPTURE IN THE ROOM

With inviting generosity and a warm atmosphere, this unique kitchen takes on a new status in the room. The desired configuration can be achieved thanks to the modular flexibility of the individual elements. The clever design saves space and offers plenty of room for atmosphere. Handles free, sleek, monolithic and self-confident, the kitchen becomes a sculpture in the room. The interior keeps what the velvety and monochromatic exterior promises.

The square elements offset at right angles are combined with dark genuine wood and stainless-steel elements. The modules are available in different sizes and allow numerous variations for custom design.

We invited Martin Steinger to an exclusive interview to find out what's behind the concept of the 356 degrees kitchen.

# STEININGER

## HOW WOULD YOU DESCRIBE BLOCK IN BRIEF?

*The BLOCK is a sculptural block island made of stone, a modern island kitchen in its purest form.*

## WHAT EXACTLY MAKES THIS MODEL SO SPECIAL?

*It is characterized by blocks positioned on top of each other, each of which has drawers on both sides. The basic elements are made with 1, 2 or 3 axes, the working element with 2 and 3 axes.*

## CHARACTERISTIC OF THE UNUSUAL KITCHEN ISLAND IS THE ABSOLUTE FRAMING OF THE ELEMENTS?

*Yes, this is written thinly and stands 2 cm above the fronts.*

*The elements are clearly defined with leather-like finish stone or shiny surfaces.*

## STONE OBJECTS OFTEN SEEM VERY CUMBERSOME, NOT SO THE BLOCK?

*Yes, the entire object radiates lightness due to its low strength. We process large-format stones with less than 8 mm thickness where for this we use a specially developed production technology.*

„THE REDUCTION TO THE ESSENTIALS AND THE VISUAL TIDINESS ARE PART OF THE CONCEPT,“

CEO & Chefdesigner Martin Steinger

## ABOUT STEININGER

---

STEININGER stands for purist, exquisite architecture, interiors and kitchens design. Mastermind Martin Steinger heads the headquarter in St. Martin (Upper Austria), with further locations in Linz, Vienna, Hamburg and London. At STEININGERS BESPOKE designs and architectural settings are in demand internationally: they inspire with striking, clear lines, timelessness and sophisticated details.

Martin Steinger is an esthete and a minimalist. Exceptional design is a decisive added value for him, as things has to work. He subordinates all designs to this creed. It defines space, shape and use accordingly. Urban concrete and rare metal alloys complete the range of materials. A new type of spatial, sensory and tactile experience arises.

### BESPOKE DESIGN - THE STEININGER COLLECTION

STEININGER designs are a statement of sustainable luxury, style and comfort. This claim continues in the unique kitchen and furniture. Every design from the STEININGER Collection is made to measure. State-of-the-art CAD programs and cutting edge manufacturing technologies in the Austria production, ensure the highest quality. The artisan take care the fine details at the end. STEININGER is a manufacturer and feels committed to the craft.
